

## ENTREPRENEURSHIP WORKSHOP AT SIMATS

One of the key focuses of Saveetha Institute of Medical and Technical Sciences (SIMATS) is to foster a spirit of entrepreneurship among its students. To achieve this, the institute offers over 1700 courses focussed on employability entrepreneurship and skill development across multiple disciplines like engineering, law, and medicine. This approach helps students to develop an entrepreneurial mindset, regardless of their field of study and the institution actively trains students to invent, patent, and commercialize their products. The institute's Management school is an active member of the National Entrepreneurship Network (NEN). This association helps our students to gain hands-on experience on Entrepreneurship through various activities like setting up business stalls, one day entrepreneurs, campus companies, seasonal business stalls and also conduct a lot of workshops, seminars and other entrepreneurial related activities.
